## EDUCATION

---

### University of Illinois Urbana-Champaign

Urbana, IL

*Master of Computer Science*

*August 2025 – May 2026*

*Bachelor of Science in Computer Science (Minor in Business)*

*August 2022 – May 2025*

## EXPERIENCE

---

### Capital One

New York, NY & McLean, VA

*Software Engineer Intern — New York, NY*

*June 2025 – August 2025*

- Developing a LLM-powered tool to create itineraries across various travel, dining, hotel, and entertainment options.

*Software Engineer Intern — McLean, VA*

*June 2024 – August 2024*

- Unified automated and manual fraud decisioning into one platform with shared-attribute linking, reducing the average handling time by 16%, saving \$5M in operational costs, and increasing investigation throughput.
- Improved application resiliency and production support via end-to-end testing, central error handling, and logging.

### Caterpillar Inc.

Chicago, IL

*Software Engineer Intern, Machine Learning Operations*

*May 2023 – December 2023*

- Achieved an eightfold increase in supported throughput by leveraging an event-driven architecture, asynchronous I/O, multi-threaded operations, and Redis caching to enhance performance and scalability.
- Cut anomaly detection pipeline runtime by 86%, boosting service sales and improving operational efficiency.

### University of Illinois

Urbana, IL

*CS 341 (System Programming) Course Assistant*

*August 2024 – Present*

- Rebuilt autograder with a Jenkins-based backend, improving maintainability and enabling flexible and comprehensive test cases, while increasing infrastructure reliability.
- Enhanced student experience by implementing limited no-questions-asked extensions within autograder.
- Built integrity checking pipelines for automated academic integrity violation detection through integration of prebuilt and custom software, scanning thousands of previous submissions on daily student submissions.
- Built infrastructure monitoring stack and served as “on-call” contact for production incidents.

*CS 357 (Numerical Methods) Course Assistant*

*January 2023 – Present*

- Assisted students with group assignments and general understanding. Championed and developed a new online textbook, increasing student and staff satisfaction while making course concepts easier to understand.

### Zakti Security Labs

Naperville, IL

*Software Engineer Intern*

*May 2019 – April 2023*

- Reduced non-compliant and unauthorized accesses to regulated systems by 15% through development of full-stack tools that enable businesses to identify and mitigate data security issues in real time.
- Built an end-to-end encrypted file transfer portal for regulated businesses with stringent privacy requirements.
- Developed disaster response plans that enable business continuity and recovery for high-risk organizations.
- Performed security audits for clients using the NIST and OCTAVE cybersecurity frameworks to deter cyberattacks and ensure compliance with HIPAA and SOC2 standards.

## PROJECTS

---

### ACM @ UIUC Core

*Aug. 2022 – Present*

- Built a serverless, multi-region, platform for event management, merchandise sales, member services, and more with 99.99% uptime for 5000+ users. Integrated enterprise controls including auditing and application monitoring.
- Improved cybersecurity posture by implementing fine-grained access controls and zero-trust security using Microsoft Entra ID and Cloudflare Access, along with custom internal tooling.

## SKILLS

---

AWS {Neptune, Fargate, Lambda, S3, DynamoDB, EC2, RDS}, C++, Java, Kafka, Kubernetes, GitHub, TypeScript, Node.JS, Python, React, Redis, SQL, CI/CD, Jenkins.
